

QUALITY AND ENVIRONMENT POLICY

ELECTRA MOLINS S.A. is a company specialized in the design, manufacturing and technical assistance of generating sets and automatisms. Since its establishment in 1948, it has always had a clear vocation of technological innovation, to offer good service and product to the customers, to satisfy their needs and the other stakeholders, to look after the workers safety and to prevent the environmental pollution that its activities, products and services may cause.

To fulfill this statement ELECTRA MOLINS S.A. takes on the following commitments:

- To comply with the needs of the organization's context and its stakeholders: the improvement in the development of processes and their internal application in the integrated management system; and the development of the organization's evolutionary lines to ensure its future.*
- To comply with customer requirements, ensuring the quality of products and services and planning and implementing actions to address risks and opportunities.*
- To apply the environmental commitments to reduce its impact on the environment and the polluting processes derived from its activities.*
- To comply with all applicable legal requirements, environmental and labour risks prevention and others; communicating and raising awareness throughout the organization, and workers under the name of Electra Molins, on the importance of satisfying these requirements.*
- To continuously improve the Integrated Management System effectiveness by providing the required resources and promoting the technical and safety training of its workers.*
